

EcoWaterTech-CI-67

CHLORINE DIOXIDE DISINFECTANT

Chemical Name: Chlorine Dioxide Disinfectant

Brand Name: EcoWatertech CI-67

CAS NO.: 10049-04-4

Chemical Formula: ClO₂

Molecular Weight: 67.45

Application:

EcoWatertech CI-67 can be used in Industrial cycling cooling water disinfection, eliminating algae and mudstick, swimming pool water and waterscape water disinfection

Specifications: 0.8g/tables , 12.Sg/tables, 25g/tables Product

Properties:

+ClO₂ content 12%

+Free activation: the process of the release of chlorine dioxide are free from the limit of water. Just put the tablet into the water to generate a quantitative high-purity chlorine dioxide, on the one hand, it completely removes the fussy and irrelative operation of the activation, while ensures that all the active ingredients dissolved into the water

+High purity: purity of the release of chlorine dioxide after dissolved 98%

+Dissolved soon: complete dissolution time needs 5 to 10 minutes

+safety and reliability: good security in transportation and storage, non-toxic residues after the use
